DETAILED ACTION

1. This is in response to amendment after final filed 6/18/07 in which claims 9 and 19 has been deleted and claims 1-8, 10-18 and 20 are pending.

After further search and examination of the present application and in view of applicant's amendment, claims 1-8, 10-18 and 20 are found to be in condition for allowance.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance: the prior art Oda teaches a CDMA reception apparatus has a plurality of fingers and performs RAKE reception by combiner and multi path detection section detects a plurality of radio waves arriving with some delay times (see abstract) and power control switch monitors the power of the finger receives (see figure 13).

Prior art Mizoguchi et al US 5,566,364 teaches receivers (R1 and R2) field level detector circuit 5, detects the intensity of the signals received and controller 6, compares the electric field level and judges the strongest electric field level, and command to keep the receiver and turn off the other receiver to power source controller 7, switches 9 and 10 (see abstract and figure 1).

On the other hand, the present application specifically teaches a plurality of receivers, each configured to receive and process wireless communication signals and to produce respective received signal versions of a wireless communication intended for reception by the WTRU and a primary receiver that is powered in a manner not controlled by the control unit and a secondary receiver that is powered in a manner controlled by the control unit. These limitation in conjunction with all other limitations, has not been disclosed, suggested or made obvious over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
